

# Workforce Innovation & Talent Centers

**Empowering Communities.  
Building Careers.**

The CVS Health® Workforce Initiatives Workforce Innovation & Talent Centers (WITCs) are local, CVS Health–operated, community-facing hubs that deliver no-cost, interactive training and vital supportive services. These centers help individuals build skills and explore in-demand health care careers in occupations such as retail customer service, pharmacy technician, and health care management, right in their own neighborhoods.

With strategically located sites in Boston, Chicago, Cleveland, Columbus, Detroit, Fort Worth, New York City, Oklahoma City, Philadelphia, Pittsburgh, Washington, D.C. and Woonsocket, WITCs work alongside trusted community organizations, schools and workforce agencies. This collaborative approach ensures programs are tailored to meet local needs.

## Inside each center participants:

- Train in simulated pharmacy and retail environments.
- Explore career options through workshops, guest speakers and job shadowing.
- Engage in customized programs designed with community partners.

Through WITCs, CVS Health is creating opportunities, building confidence and shaping the future of health care, one career at a time, reinforcing our position as America's most trusted health care company.
