

INDEPENDENT ASSURANCE STATEMENT

To: The Stakeholders of CVS Health

Objectives and Responsibilities

Apex Companies, LLC (Apex) has been engaged by CVS Pharmacy, Inc. ("CVS") to provide moderate assurance of certain GRI and SASB Standards Disclosures in its *Healthy 2030 2024* Impact Report Appendix (the Report). This assurance statement applies to the related information included within the scope of work described below.

This information and its presentation in the Report are the sole responsibility of the management of CVS. Apex was not involved in the drafting of the Report. Our sole responsibility was to provide independent assurance on its content.

Scope of work

The scope of work included assurance of the following information included within the Report for the period January 1, 2024 to December 31, 2024 ("Subject Matter"):

- Select disclosures related to the material issues of affordability and fair pricing; climate risk, resilience and adaptation; consumer health outcomes; data security, privacy and cybersecurity; greenhouse gas (GHG) emissions and energy use; health access; health equity; occupational health and safety; public policy and advocacy; service quality and safety; sustainable products and services; circularity; talent recruitment, retention and development; and general disclosures for Global Reporting Initiative (GRI) Standard 2 in the *Healthy 2030 2024* Impact Report Appendix. Specific disclosures assured are shown in the attached table;
- Appropriateness and robustness of underlying reporting systems and processes, used to collect, analyze and review the information reported;
- Evaluation of the nature and extent of CVS' adherence to the general principles of AA1000AS v3:
 - Inclusivity
 - Materiality
 - Responsiveness
 - Impact;
- Evaluation of the Subject Matter against the principles of Completeness and Accuracy as defined in the related GRI and SASB Standards; and
- Select 2024 sustainability data (Previously assured under other assurance standards):
 - GHGs:
 - Scope 1
 - Scope 2 Location-Based
 - Scope 2 Market-Based
 - Scope 3 Purchased Goods & Services
 - Scope 3 Fuel and Energy Related Activities
 - Scope 3 Upstream Transportation & Distribution
 - Scope 3 Business Travel
 - Water usage

Our assurance does not extend to any other quantitative data included in the Report.

Reporting Criteria

The Subject Matter needs to be read and understood together with the GRI and SASB Standards as described in the Report.

Limitations and Exclusions

Excluded from the scope of our work is any assurance of information relating to:

- Activities outside the defined assurance period; and
- Positional statements (expressions of opinion, belief, aim or future intention by CVS) and statements of future commitment.

Assurance Standard

The assurance process was conducted in line with the requirements of AccountAbility's AA1000 Assurance Standard v3 (AA1000AS v3) with Type 2 assurance.

The work was planned and carried out to provide moderate, rather than absolute assurance and we believe it provides a reasonable basis for our conclusions.

Summary of Work Performed

As part of its independent assurance, Apex undertook the following activities:

1. Conduct interviews with relevant personnel of CVS and their consultant;
2. Review of documentary evidence produced by CVS;
3. Review of performance data including calculations, emission factors, supporting documentation and audit of a sample of which was traced back to the source data;
4. Review of CVS' procedures and systems for collection, aggregation, analysis and review of data; and
5. Review of stakeholder engagement activities by reviewing reports.

Our work was conducted against Apex's standard procedures and guidelines for external Assurance of Sustainability Reports, based on current best practice in independent assurance.

Conclusions

On the basis of our scope of work, methodology and the activities described above, it is our opinion that:

- The disclosures listed in the attached GRI and SASB index table are accurate, reliable and free from material mistake or misstatement;
- The Subject Matter provides a fair representation of CVS' activities over the reporting period;
- The Subject Matter is presented in a clear, understandable and accessible manner, and allows readers to form a balanced opinion over CVS' performance and status for the assurance period;
- The Subject Matter properly reflects the organization's alignment to and implementation of the AA1000AS v3 principles of Inclusivity, Materiality, Responsiveness and Impact in its operations. Further detail is provided below;
- CVS has established appropriate systems for the collection, aggregation and analysis of relevant information; and
- CVS has processes in place for consulting and engaging with its key stakeholders in a structured and systematic manner.

Alignment with the principles of AA1000AS v3

Inclusivity

CVS has processes in place for identifying and engaging with a range of key stakeholders including patients and consumers, colleagues, investors and stockholders, suppliers, government and regulators, nonprofit organizations and NGOs, industry groups and forums, local communities, clients and media as described in the Report. These engagement activities include a diverse range of outreach methods, including but not limited to written communications, meetings, surveys and events such as roundtables, conferences, audits, focus groups and town halls. CVS manages outreach and tailors engagement to specific stakeholders, utilizing a cross-functional ESG steering committee for ongoing strategy development, and maps stakeholder feedback directly to material topics. Additionally, CVS conducts a biennial materiality assessment where stakeholder groups are engaged for input and participation.

Materiality

CVS conducts a materiality assessment biennially to identify the material topics to disclose in its reporting. The most recent materiality assessment was conducted in 2023 and included a survey of various internal and external stakeholders regarding CVS' impacts on the environment, society and economy to identify the potential material topics. The assessment was conducted with a double materiality lens and represented a shift to an impact-based approach wherein severity and likelihood of impacts were assessed. Material topics were selected based on internal research to correlate impacts to:

- enterprise value;
- society and the environment;
- engagement efforts across the enterprise; and
- the outcome of impact scoring and alignment of topics within a prioritization matrix.

Material topics identified in the 2023 that were not part of the previous assessment include: issues of affordability and fair pricing; climate risk, resilience and adaptation; consumer health outcomes; data security, privacy and cybersecurity; greenhouse gas (GHG) emissions and energy use; health access; occupational health and safety; public policy and advocacy; service quality and safety; sustainable products and services; circularity; and talent recruitment, retention and development. The assessment process and material topics are described in the Report.

Responsiveness

CVS demonstrated responsiveness to material issues during the assurance period through various actions described in the Report, such as its nationwide environmental health impact initiative which offers support through personalized health interventions to people most vulnerable to extreme weather events. CVS responds to issues raised during the course of stakeholder engagement activities through:

- coordination of response groups within the cross-functional ESG steering committee;
- a committee of board members with oversight into sustainability work; and
- a continually evolving roster of internal senior leaders.

The company investigates issues raised through various reporting channels and takes remedial measures as deemed appropriate. In an effort to support ongoing communication of response implementation, CVS uses various reporting frameworks and principles to guide their reporting process and external communications, including GRI and SASB. For climate risk and opportunities disclosure, ISSB is utilized. The Report discusses responses by the company to its material issues.

Impact

CVS has established processes to measure, evaluate and manage the company's impacts related to material topics. Dedicated team members are assigned to oversee continued measurement and assessment of the boundary, time period and scope of impacts, ensuring that qualitative and quantitative impact metrics are clearly traceable within the organization. The company uses its materiality assessment and corporate risk register to capture and measure both actual and potential impacts, including direct and indirect, intended and unintended, and positive and negatives. In 2024, CVS made progress in pursuit of reducing their greenhouse gas emissions through a focus on significant investments in renewable energy, electrification of its fleet, and continuous improvement in operational efficiency. An internal audit process provides an additional layer of review for these efforts. CVS calculates and reports GHG emissions annually. 2024 progress towards impact goals included: a 29% reduction in scope 1 and 2 GHG emissions from 2019 baseline and 14% decrease from 2023 to 2024; executed agreements to source over 100k MWh of renewable energy; and 13% of paper packaging in store brand products with sustainable sourcing certifications.

Completeness

Based on our review, the select disclosures appropriately and accurately demonstrate that CVS understands and manages the material topics that were subject to assurance.

Accuracy

As indicated in our conclusions above, the select disclosures included in the scope of work were found to be accurate, reliable and free from material mistake or misstatement. CVS has established appropriate systems for the collection, aggregation and analysis of relevant information to allow for accurate reporting of data associated with the select disclosures that were within the scope of this assurance.

This independent statement should not be relied upon to detect all errors, omissions or misstatements that may exist within the assured disclosures in the Report.

Based on the work conducted, we recommend CVS to consider the following:

- Continue to evaluate materiality of issues based on stakeholder and employee input and adjust reporting as deemed appropriate.
- Disclose indicators that are currently omitted.

Statement of independence, integrity and competence

Apex is an independent professional services company that specializes in Health, Safety, Social and Environmental management services including assurance with over 30 years history in providing these services.

No member of the assurance team has a business relationship with CVS, its Directors or Managers beyond that required of this assignment. We conducted this assurance assignment independently and to our knowledge there has been no conflict of interest.

Apex has implemented a Code of Ethics across the business to maintain high ethical standards among staff in their day-to-day business activities.

The assurance team has extensive experience in conducting assurance over environmental, social, ethical and health and safety information, systems and processes, has over 20 years combined experience in this field and an excellent understanding of Apex's standard methodology for the assurance of sustainability reporting.
