

Transform Oncology Care strives to provide targeted strategies for every step of the cancer care journey.

1 **Best therapy and treatment, faster**

2 **Best quality at a lower cost**

3 **Best experience for the patient**

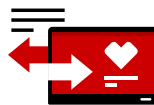

Real-time prior authorization (PA) integrated with NCCN Guidelines for further utilization management

Broad-panel gene sequencing for more complete, precise patient profile

Clinical trial recommendations to increase access to innovative therapies

Value-based provider contracts aligning provider-payor incentives

Optimize site of care and enable at time of PA to reduce cost of treatment

Proactive patient support to manage risks and reduce emergency room (ER) visits

**Decrease medication errors**

**Reduce wasteful spend**

**Reduce therapy spend**

**Optimize provider performance**

**Redirect high-cost site of care**

**Fewer ER visits and hospitalization**
